

Government Services

Environmental Scientist

Perot Systems Government Services (PSGS), a contractor to the National Oceanic and Atmospheric Administration (NOAA) Coastal Services Center (Center), seeks an individual to serve as an Environmental Scientist to support the Center's Landscape Characterization and Restoration (LCR) Program. The successful candidate will be an integral part of the LCR team providing technical and project management support to the LCR program and the Center on various projects related to coastal community resilience, ecosystem-based management tools, environmental characterizations, and habitat restoration.

Key duties and responsibilities include:

- Researching and interpreting information related to ecosystem management.
- Participating in key meetings, conferences, and workshops.
- Participating in internal and external project teams; building partnerships.
- Compiling, organizing, and analyzing data in a GIS.
- Developing and updating information about geospatial tools.
- Travel may be required.

Key skills required for the position include:

- Masters degree in Environmental Science, Biology, Ecology, Geography or related field.
- Excellent oral and written communication skills.
- Experience using GIS software for mapping, data organization, and spatial analysis (preferably ESRI's ArcGIS 9x).

Additional preferences:

- Formal project management experience or training.
- Experience with geospatial tool use in natural resource planning and management.

In addition to the core duties and skills outlined above, the position will support other functions and special projects delegated from contract management.

Located in Charleston South Carolina, the NOAA Coastal Services Center serves the nation's coastal resource management community by facilitating access to and utilization of the most up-to-date information, management strategies, and technology.
